

REBECA ERDMAN

Front-End Developer / Software Engineer

PROFESSIONAL PROFILE

Software Engineer and Front-End Developer specialized in the React, TypeScript, and Tailwind CSS ecosystem. Competent in building and deploying functional web applications autonomously, from pixel-perfect Figma design--to-code translation to automating CI/CD pipelines via GitHub Actions and integrating backend solutions (Firebase/REST APIs). Focused on reliable delivery—combining type-safe code, clean architecture, and accessibility best practices (WCAG)—to eliminate repetitive manual work, mitigate technical risks, and streamline team velocity. Highly disciplined and fully adapted to remote work dynamics.

PERSONAL INFORMATION

Location: Lisbon, Portugal (Open to 100% Remote)

SKILLS

- **Programming Languages:** JS (ES6+), TypeScript, HTML5, CSS3
- **Frameworks:** React, Tailwind CSS
- **Tools:** Firebase, Git, GitHub
- **Core Practices:** DOM, APIs, Clean Code, Responsive Design

PROJECTS

- **Collab Clinic** <https://appointments-five-flame.vercel.app/> - Online booking system for desktop. Developed with React, TypeScript, Tailwind CSS, and Firebase Firestore to handle dynamic appointment scheduling and data persistent layers.
- **Tasks App** <https://tasks-app-blue.vercel.app/> - Workflow organizer focused on strict typing for data safety. Developed with React, TypeScript, and Tailwind CSS to structure reliable application states.
- **Employee Management** <https://github.com/rebecafloriano/user-directory> – This is an employee management application developed with React, TypeScript, and Tailwind CSS. The application allows you to perform all CRUD operations (Create, Read, Update, and Delete) by consuming a real API in the cloud.
